XHUD1000 Quick Start
For XHUD1000 & XGPS190 with Apple

1. Turn on the XGPS190 and choose your XGPS190 under the Bluetooth list from the iPad settings.

2. Power up XHUD1000. Dual logo will appear on HUD screen. After logo disappears, open Dual ADS-B Status Tool app.

3. Go to HUDControl tab of app, and tap the "XHUD" switch to connect HUD.

4. Tap "Bluetooth" and choose the XGPS190.

Your HUD should now be connected. You can select AHRS, Traffic, and other settings from HUD Control Tab.

XHUD1000 Firmware
update steps for Apple devices

Reminders:

- When updating firmware, ONLY HUD and Apple device should be powered on. Do not power up portable GPS receiver or other devices.
- Ensure that WiFi and Bluetooth are enabled in Apple device, and that Apple device is connected to internet.
- Do not unplug HUD during firmware update process.

1. Power up XHUD1000. Dual logo will appear on HUD screen for a few seconds. After logo disappears, open Dual ADS-B Status Tool app.

2. Select HUDControl tab, and tap 'XHUD' to connect your HUD.

3. Tap 'HUD Software Version'.

4. Tap 'Download and Install' and follow the instructions on Apple device.   Loading will take several minutes.
