IGNITION HARNESSES – IGNITERS – EXCITER

LIGHTWEIGHT HIGH TEMPERATURE SHIELDED IGNITION HARNESSES MFG. BY ACS PRODUCTS CO.

New production ignition harnesses for Experimental Aircraft at remarkably low prices. Late type 5MM wire constructed of 16 strands of tightly braided copper wire impregnated with scuff resistant white silicone. All strands must fracture before a complete open circuit type failure occurs thus extending lead life. Lead flexibility is retained from -65° to 400° F. Moisture and cleaning solvent penetration is eliminated by the impregnated silicone coating. This extremely flexible wire lends itself to sharp bends thereby eliminating the

need for old style harness elbows. No soldered joints in the grounding need for old style namess elbows. No soldered joints in the grounding circuit. Custom made for most 4 cylinder and 6 cylinder engines using Bendix or Eisemann magnetos and 4 cylinder engines using Slick magnetos. Cable outlet plates are not furnished for Bendix and Eisemann mags as these are already installed on the magnetos in service. They must be purchased separately for new magneto installations. Harnesses for Slick magnetos are furnished with the backplates installed. Standard harnesses for the Bendix S4/S6 mags are fitted with a male nut which screws into the threaded outlet plate on the back of the mag.

HARNESSES FOR BENDIX AND EISEMANN MAGNETOS

All 4-Cylinder Harnesses (8 wires) All 6-Cylinder Harnesses (12 wires) (Not Available for Bendix S1200 Magnetos)
Replacement Leads to 48" (Specify Length)......Call For Quote (Bendix & Eisemann only)

HARNESSES FOR SLICK MAGNETOS For 4000, 4200 & 4300 Series Mags (4 Cyl.) Only................................\$187.75 All Harnesses Furnished with Cable Ties and Clamps For plugs with 5/8-24 barrel size only.

ENGINE BAFFLE IGNITION WIRE SEALS

352

Seal Type	Part No.	Each
5mm Wire Seal Three-Wire	376	
5mm Wire Seal Slick 3-Wire	07-26962	
5mm Wire Seal Slick 2-Wire	M2375	
5mm Wire clamp Slick 2-Wire	M2755	

HIGH TENSION CABLE

Unshielded 7MM ignition cable consists of tinned conductor, rubber insulation, reinforced glass braid and Hypalon jacket that resists sun, weather, heat, chemicals and oxidation by ozone. Temperature range -65° to 250°F

CHAMPION IGNITERS

The research and development team at Champion Aerospace has pioneered the use of exotic materials to extend the life and enhance performance of turbine Igniters. The patented Champion Series

21TM Igniter and lead incorporate numerous design benefits that improve performance, installation, and maintenance. Variable immersion depth allows it to be used in multiple engine platforms. The self-centering conical contact virtually eliminates flashover and arcing.

dar contact virtually climinated hadriever and aroning.

CHAMPION EXCITERS

Champion Aerospace manufactures a broad range of high performance ignition exciters. From pioneering designs in solid-state technology, to the new, patented PPT exciter, the first true hightension solid-state exciter, Champion combines the reliability and performance critical to aviation applications.

The Champion solid state ignition exciters are significantly lighter and more compact than any existing product on the market. PPT combines the technologies of both solid-state and spark-gap technology, but suffers none of the drawbacks.

CHAMPION IGNITION LEADS

Champion Aerospace designs and manufactures a full range of aerospace ignition leads for turbine engine applications. New ignition leads from Champion Aerospace are available for a wide

range of turbine engines, from small turbine APU applications to the large GE and PW turbofan engines, including the new Rolls Royce Trent 900 engines for A380 aircraft.

CT-496 IGNITER LEAD CONNECTOR WEAR GAUGE

Igniter lead connector wear gauge for ARP670 type 2M fittings common to PT6 leads and others. Features a calibrated pin to measure connector wear. Opposite end sized to measure neoprene grommet expansion.

Note: Many leads incorporate type 2M and 3M connectors at oppo-P/N 12-04959
